The MMCRI Summer Student Research Program offers undergraduates a unique opportunity to conduct research in diverse clinical and biomedical science fields during the summer months.

During the ten-week program, students participate in mentored, independent research projects either in our state-of-the-art research facility in Scarborough, or working with physicians in a hospital setting to impact patient care or the outcome of treatment.

Students also attend lectures and workshops featuring topics including bioethics, animal use in biomedical science and scientific presentation skills, as well as the opportunity to attend presentations by guest scientists and MMCRI faculty.

Summer Students become employees of Maine Medical Center and are paid at an hourly rate bi-weekly. The total amount generally works out to approximately $4,600 for the ten week program, working 40 hours per week. Students are responsible for their own transportation and housing.

Application Deadline: February 1, 2018
