

My theory has a first name,
it's V-S-E-P-R.
My theory has a claim to fame,
it says where electrons are.
Oh, I count electron groups all day,
and if you ask my why, I'll say . . .
'Cause VSEPR theory has a way to keep electrons
far away!

-Kevin Rice

Oh, I wish I were an 's' atomic orbital.
That is what I truly want to be.
'Cause if I were an 's' atomic orbital,
'p' orbitals would hybridize with me!

-Kevin Rice
