

Date	Title	Speaker	Student Hosts
17-Sep	Design of Anticancer Agents that Hijack Transcription Factors	John Essigmann, MIT	Tim Newhouse, Mike Walsh
24-Sep	Using Photons to Move Electrons: Applications to Organic Chemistry and DNA Repair	Daniel Falvey, University of Maryland	Kevin Selby, Stanislav Presolski
1-Oct	Recent Advances in the Thermal Chemistry of Simple Hydrocarbons	John Baldwin, Syracuse University	Corey Gittleman
8-Oct	Bioinorganic Chemistry of Titanium in Medicine and the Environment	Ann Valentine, Yale University	Ivan Mihajlov
15-Oct	Fall Break		
22-Oct	Reactive organolithium compounds - NMR, x-ray diffraction and reactivity studies	Paul Williard, Brown University	Cary Fridrich
29-Oct	Targeting Biodefense Organisms: From Structure to Drugs	Amy Anderson, Dartmouth College	Michael Feldman
5-Nov	The Art and Science of Chemical Demonstrations	David Heroux, UMF	Zack Sager, Devon Hutton, Rodney Yeoh
