Getting the right preventive care services at the right time can help you stay healthier by:

• Preventing certain illnesses and health conditions from happening; or
• Detecting a health problem at a stage that may be easier to treat.

That’s why your Cigna plan covers designated preventive care services. When you receive care in-network, it generally is at a lower cost to you. Depending on your plan, in-network preventive care services may be covered at 100% – but be sure to check your plan materials for details about your specific medical plan.

To make sure you get the care you need – without any unexpected out-of-pocket costs – it’s important for you to understand the following:

• What a preventive care service is; and
• Which services your health plan will cover.

What is a preventive care service?

Preventive care services are provided when you don’t have any symptoms and haven’t been diagnosed with the health issue connected with the preventive service. For example, a flu vaccination is given to prevent the flu before you get it. Other preventive care services like mammograms can help detect an illness when there aren’t any symptoms. Even if you’re in the best shape of your life, a serious condition with no signs or symptoms may put your health at risk. During a wellness exam, you and your doctor will determine what tests and health screenings are right for you based on your age, gender, personal health history and current health.

Even when your appointment is for a preventive exam, you may receive other services during that exam that are not preventive care services. For example, your doctor may check on a chronic condition such as heart disease. When your doctor determines that you have a medical issue present, the additional screenings and tests after this diagnosis are no longer considered preventive. These services are covered under your plan’s medical benefits, not your preventive care benefits. This means you may be responsible for paying a different share of the cost than you do for preventive care services.

The charts on the following pages outline the various services and supplies considered as preventive care under your plan. If you have additional questions about preventive care services, talk to your doctor or call Cigna at the toll-free number on the back of your ID card.
### Wellness exams

<table>
<thead>
<tr>
<th>SERVICE</th>

---

1. Subject to the terms of your plan's pharmacy coverage, certain drugs and products may be covered at 100%. Your doctor is required to give you a prescription, including for those that are available over-the-counter, for them to be covered under your Pharmacy benefit. Cost sharing may be applied for brand name products where generic alternatives are available. Please refer to Cigna’s “No Cost Preventive Medications by Drug Category” Guide for information on drugs and products with no out-of-pocket cost.

2. Subject to the terms of your plan’s medical coverage, breast-feeding equipment rental and supplies may be covered at the preventive level. Your doctor is required to provide a prescription, and the equipment and supplies must be ordered through CareCentrix, Cigna’s national durable medical equipment vendor. Precertification is required for some types of breast pump equipment.

3. Examples include oral contraceptives; diaphragms; hormonal injections and contraceptive supplies (spermicide, female condoms); emergency contraception.

4. Subject to the terms of your plan’s medical coverage, contraceptive products and services such as some types of IUDs, implants and sterilization procedures may be covered at the preventive level. Check your plan materials for details about your specific medical plan.

---

These preventive health services are based on recommendations from the U.S. Preventive Services Task Force (A and B recommendations), the Advisory Committee on Immunization Practices (ACIP) for immunizations, the American Academy of Pediatrics’ Periodicity Schedule of the Bright Futures Recommendations for Pediatric Preventive Health Care, the Uniform Panel of the Secretary’s Advisory Committee on Heritable Disorders in Newborns and Children and, with respect to women, evidence-informed preventive care and screening guidelines supported by the Health Resources and Services Administration. For additional information on immunizations, visit the immunization schedule section of www.cdc.gov. This document is a general guide. Always discuss your particular preventive care needs with your doctor.

**Exclusions**

This document provides highlights of preventive care coverage generally. Some preventive services may not be covered under your plan. For example, immunizations for travel are generally not covered. Other non-covered services/supplies may include any service or device that is not medically necessary or services/supplies that are unproven (experimental or investigational). For the specific coverage terms of your plan, refer to the Evidence of Coverage, Summary Plan Description or Insurance Certificate.
