WATERSHED ASSESSMENT INTRODUCTION	1
EXECUTIVE SUMMARY	1
LONG POND CHARACTERISTICS	35
Watershed Description.....	35
Historical Perspective	37
Water Quality.....	37
General Chemistry	37
Gloeotrichia.....	38
Regional Land-use Trends.....	38
Biological Perspective	40
Introduction.....	40
Native Aquatic Flora.....	40
Fish Stocking	40
Invasive Plants	42
Trophic Status	42
Geological and Hydrological Perspective.....	43
STUDY OBJECTIVES.....	45
Introduction	45
Land-Use Assessment.....	45
Water-Quality Assessment.....	45
Future Trends	46
ANALYTICAL PROCEDURES AND RESULTS	47
GIS	47
Introduction.....	47
WATERSHED LAND-USE PATTERNS.....	49
Introduction.....	49
Methodology	49
Wetlands	53
Forest Types.....	56
Cleared Land.....	58
Regenerating Land.....	59
Commercial and Residential.....	59
WATERSHED DEVELOPMENT PATTERNS	61
Roads.....	61
Introduction.....	61
Methods.....	62
Results and Discussion	63
Road Problems	64
Residential Survey	72
House Count.....	72
Introduction.....	72
Methods.....	72

Results and Discussion	73
Buffer Strips.....	74
Introduction.....	74
Methods.....	75
Results and Discussion	76
Subsurface Disposal Systems	79
Introduction.....	79
Methods.....	80
Results and Discussion	80
Septic Suitability Model	81
Introduction.....	81
Methods.....	82
Results and Discussion	82
Erosion Potential Model	85
Introduction.....	85
Methods.....	86
Soils.....	86
Slope	86
Land Use	87
Weighted Overlay	88
Results and Discussion	89
Erosion Impact Model.....	91
Introduction.....	91
Methods.....	91
Erosion Potential.....	91
Proximity Zones.....	91
Weighted Overlay	91
Results and Discussion	92
Development Potential Model	93
Introduction.....	93
Methods.....	93
Results.....	95
WATER QUALITY STUDY SITES.....	97
Sample Sites.....	97
Tributaries	97
LONG POND WATER QUALITY ASSESSMENT	99
Physical Measurements.....	99
Dissolved Oxygen and Temperature.....	99
Introduction.....	99
Transparency.....	106
Introduction.....	106
Methods.....	107
Results and Discussion	107
Turbidity	109
Introduction.....	109
Methods.....	109

Results and Discussion	110
Chemical Analyses.....	111
pH.....	111
Introduction.....	111
Total Phosphorus	114
Introduction.....	114
Methods.....	115
Results and Discussion	116
Biological Parameters	119
Chlorophyll-a	119
Introduction.....	119
Methods	119
Results and Discussion	120
WATER BUDGET	123
Introduction.....	123
Methods.....	123
Results and Discussion	124
PHOSPHORUS BUDGET	127
Introduction.....	127
Methods.....	127
Results and Discussion	128
FUTURE PROJECTIONS.....	131
POPULATION TRENDS	131
Historic Population Trends	131
Future Population and Development Trends	132
RECOMMENDATIONS.....	133
WATERSHED MANAGEMENT	133
Roads.....	133
Land Use	133
Boat Ramp	134
Community Awareness and Education.....	134
ACKNOWLEDGEMENTS	136
LITERATURE CITED	137
APPENDICES.....	142

Tables

Table 1.	Characteristics of oligotrophic, eutrophic, and dystrophic lakes.....	9
Table 2.	Characteristics of freshwater inland wetlands	33
Table 3.	Fish species present in Long Pond.....	41
Table 4.	Invasive aquatic plants threatening Maine's inland waters	42
Table 5.	Percent area of land-use types	54
Table 6.	House count comparison for 1995 and 2006.....	60
Table 7.	House count data by category for 2006.....	73
Table 8.	Residential density for selected Maine lakes.....	74
Table 9.	Land-use erosion potential ratings	87
Table 10.	Mean surface pH of Long Pond North and nearby lakes	114
Table 11.	Flushing rate of Long Pond North and other Belgrade lakes	126
Table 12.	Percent contribution of phosphorus by land-use type.....	130

Figures

Figure 1.	Lake turnover.....	7
Figure 2.	Phosphorus cycles within a lake.....	12
Figure 3.	Nitrogen cycles within a lake	13
Figure 4.	Runoff characteristics of watersheds near Augusta, Maine	17
Figure 5.	Ideally buffered home.....	20
Figure 6.	Layout of a typical septic system	23
Figure 7.	Components of a typical septic system treatment tank.....	24
Figure 8.	Political boundaries dividing the Long Pond North watershed.....	36
Figure 9.	Land-use map of Long Pond North watershed.....	55
Figure 10.	Percent land-cover comparison, 1991 and 2003.....	57
Figure 11.	Photo of a good culvert.....	62
Figure 12.	Photo of a poorly maintained culvert	62
Figure 13.	Photo of an eroded road in need of a diversion	63
Figure 14.	Percent road area of camp and state roads categorized by quality	64
Figure 15.	Road ratings map for the Long Pond North watershed	65
Figure 16.	Road problem sites within the Long Pond North watershed.....	66
Figure 17.	Photos of a good and poor buffer	75
Figure 18.	Percent of properties in each buffer quality category	77
Figure 19.	Composition of buffer quality categories by lot size.....	77
Figure 20.	Buffer quality map of Long Pond North’s shoreline.....	78
Figure 21.	Soil series map of the Long Pond North watershed	83
Figure 22.	Septic suitability map of the Long Pond North watershed.....	84
Figure 23.	Erosion potential flowchart used for GIS map	89
Figure 24.	Erosion potential map of the Long Pond North watershed	90
Figure 25.	Impact of erosion flowchart used for GIS map	92
Figure 26.	Impact of erosion map of the Long Pond North watershed.....	94
Figure 27.	Development potential map of the Long Pond North watershed	96
Figure 28.	Sampling locations on Long Pond North	98
Figure 29.	Dissolved oxygen profile at site 1 for summer 2006.....	101
Figure 30.	Projected anoxic areas in Long Pond North during summer 2006.....	102
Figure 31.	Historic depths of low dissolved oxygen concentration at site 1	103
Figure 32.	Temperature profile at sites 1 and 3 for summer 2006.....	104
Figure 33.	Historic temperature profile for site 1	105
Figure 34.	Temperature and dissolved oxygen profiles for two dates at site 1.....	106
Figure 35.	Mean Secchi depth at site 1-3 during summer 2006	108
Figure 36.	Historic water clarity at site 1	108
Figure 37.	Surface, mid, and bottom turbidity at site 1 for summer 2006.....	110
Figure 38.	Mean surface trubidity at sites 1-4 for summer 2006.....	111
Figure 39.	Profile of pH at site 1 for summer 2006	113
Figure 40.	Historic pH values at site 1	114
Figure 41.	Mean total phosphorus at sites 1-4 for summer 2006.....	116
Figure 42.	Mean phosphorus concentrarions at site 1 in June, July, and August 2006	117
Figure 43.	Mean phosphorus concentrations at site 3 in June, July, and August 2006	118

Figure 44. Historic phosphorus concentrations at site 1 119
Figure 45. Chlorophyll profile at sites 1 and 2 for summer 2006..... 121
Figure 46. Historic chlorophyll concentrations at site 1 122
Figure 47. Long Pond North direct and indirect watershed map 125
Figure 48. Population trends for the towns of Belgrade and Rome 131

Appendices

Appendix A.	Water-Quality Measurements and Tests	143
Appendix B.	Quality Assurance.....	144
Appendix C.	Physical Measurements & Chemical Analyses of Long Pond Water Quality	148
Appendix D.	Water Budget Values and Calculation	159
Appendix E.	Phosphorus Model Equation.....	160
Appendix F.	Predictions for Annual Mass Rate of Phosphorus Inflow.....	164
Appendix G.	Road index Figures and Survey Forms	165
Appendix H.	Personal Communications.....	167
Appendix I.	Buffer Strip Survey.....	168
Appendix J.	Residential Survey Form.....	169
