

**Colby College**  
**2023 Summer Programs**  
**COVID Policies**

- Colby will not mandate vaccination, testing, or other COVID controls for summer programs.
- Groups and campus guests are responsible for creating/enforcing any COVID controls they want to adopt.
- Colby will likely also be moving away from a vaccination requirement for employees in the coming months. If programs are requiring any COVID protections from staff at Colby supporting their programs, and we cannot provide those protections, they have to hire or otherwise find support at their own cost and expense, and such staffing support must be acceptable to Colby, and they will receive direction from Colby so that support is appropriately provided, consistent with Colby policies.
